Hagmann, D., Ho, E. H., & Loewenstein, G. (2019). Nudging out support for a carbon tax.

Nature Climate Change, 9(6), 484-489. doi:10.1038/s41558-019-0474-0

How can people get on board with supporting a carbon tax?

“We propose that nudges can also interact indirectly with more substantive policies by reducing support for them”

Zhang, K., Xue, M., Feng, K., & Liang, Q. (2019). The economic effects of carbon tax on china's provinces. Journal of Policy Modeling, 41(4), 784. doi:10.1016/j.jpolmod.2019.02.014

What are the economic effects of a carbon tax?

“The results show that the consumption-based accounting principle performs better in protecting the underdeveloped regions, especially when the carbon tax revenue is reimbursed to low-income households; carbon tax has a negative impact on the energy intensive sectors under both the production- and consumption-based principles”

Goulder, L. H., Hafstead, M. A. C., Kim, G., & Long, X. (2019). Impacts of a carbon tax across US household income groups: What are the equity-efficiency trade-offs? *Journal of Public Economics*, 175, 44-64. doi:10.1016/j.jpubeco.2019.04.002

Are there any true benefits of a carbon tax?

“We find that under a range of recycling methods, the use-side impacts are consistently regressive, while the source-side impacts are usually progressive. The source-side impacts tend to more than fully offset the use-side impacts, so the overall impact is either progressive or close to proportional.”

Cornwall, W. (2019). Global warming may boost economic inequality. *Science*, doi:10.1126/science.aax7820

How does global warming affect the average person?

“The study’s statement that warming should have already harmed economic opportunities in poor countries is extremely important”

Barbier, E. B. (2019). How to make the next green new deal work. *Nature*, 565(7737), 6-6. doi:10.1038/d41586-018-07845-5

What can be done to improve the new deal to make it more enticing for countries to get on board?

“The Green New Deal should not be funded with deficit spending. Saddling future generations with unsustainable levels of national debt is just as dangerous as burdening them with an economy that is environmentally unsustainable”
